INDONESIAN JOURNAL OF CANCER CHEMOPREVENTION ARTICLES

- Platinum Metal Complexes Of *Carbaboranylphosphines*: Potential Anti Cancer Agents
(Ilham Maulana, Peter Loennecke, and Evamarie Hey-Hawkins) 1-11
- Structure Modification of Ethyl *p*-methoxycinnamate Isolated from *Kaempferia galanga* Linn.
and Citotoxicity Assay of The Products on WiDr cell
(Juni Ekowati, Marcellino Rudyanto, Shigeru Sasaki, Tutuk Budiati, Sukardiman,
Adam Hermawan and Edy Meiyanto) 12-18
- Kaempferia galanga* L. Rhizome as a Potential Dental Plaque Preventive Agent
(Triana Hertiani, Sylvia Utami Tunjung Pratiwi, Iramie Duma Kencana Irianto and Aini Febriana) 19-25
- Synergistic Combination Of Ciplukan (*Physalis angulata*) Herbs Ethanolic Extract and
Doxorubicin on T47D Breast Cancer Cells
(Inna Armandari, Kartika Dyah Palupi, Sofa Farida, Adam Hermawan, Ratna Asmah Susidarti and
Edy Meiyanto) 26-31
- Leunca (*Solanum nigrum* L.) Herbs Ethanolic Extract Increase Cytotoxic Activity of
Cisplatin on Hela Cervical Cancer Cells
(Raditya Prima Istiaji, Maya Fitria, Larasati, Fortunella Tjondro, Astrid Ayu Maruti, Erna Prawita
Setyowati and Edy Meiyanto) 32-37
- Antioxidant Activity Test Of 2,6-Bis-(2'-Furilidyn)-Cyclohexanone, ; 2,5-Bis-(2'-Furilidyn)-
Cyclopentanone,; 1,5-Difuryl-1,4-Pentadien-3-One
(Ismi Rahmawati, Endang Sri Rejeki and Sardjiman) 38-42
- Curcumin And Extract Of *Plantago major*, L Increased SPF Value of Cold Cream Base
(Nining Sugihartini) 43-47
- The Effect of Addition of Antioxidant to The Stability of Green Tea Water Extract As
Anti Acne
(Nadya Fadila Saib) 48-53
- Potency of Industrial Tea Waste: Comparison Between Green and Black Tea Industrial
Wastes as UV Filter for Sunscreen
(Yohanes Martono) 54-59
- The Influence of DMBA (7,12-dimethylbenz-[a]anthracene) Regimen in the Development
of Mammae carcinogenesis on *Sprague dawley* Female Rat
(Agung Eru Wibowo, Sriningsih, Puspita Eka Wuyung, Raafqi Ranasasmita) 60-66

Preface

Indonesian Journal of Cancer Chemoprevention (IJCC) established in 2010 is a peer reviewed journal publishing original articles, reports, and reviews on all areas of cancer, carcinogenesis, cancer biology, cancer chemoprevention, pharmacology and toxicology of cancer, and cancer therapeutic that published in English by Indonesian Society for Cancer Chemoprevention.

This issue is the first published of the journal and accept original articles related areas. The current issue is contains ten articles selected from International Seminar on Chemoprevention for Health Promotion and Beauty. Maulana et al performed platinum metal complexes of carbaboranylphosphines: potential anti cancer agents. The structure of the platinum complexes consists of a slightly distorted square-planar coordination sphere and platinum atoms exhibit the coordination number four, which is preferred in platinum(II) complexes. Ekowati et al conducted structure modification of ethyl p-methoxycinnamate isolated from *Kaempferia galanga* Linn. and their cytotoxicity on WiDr cell. Triana Hertiani et al performed potential dental plaque preventive agent from *Kaempferia galanga* Linn. rhizome. Armandari et al studied synergistic combination of ciplukan (*Physalis angulata*) herbs ethanolic extract and doxorubicin on T47D breast cancer cells. Istiaji et al studied the cytotoxicity activity of combination of Leunca (*Solanum nigrum* L.) and cisplatin on Hela cells. Rahmawati et al performed the antioxidant activity of 2,6-bis-(2'-furilidyn)-cyclohexanone, 2,5-bis-(2'-furilidyn)-cyclopentanone, and 1,5-difuryl-1,4-pentadien-3-one. Sugihartini reported that curcumin increased SPF value after addition of the optimum of curcumin and the extract of *Plantago major* L. Saib reported that the addition of sodium sulfite 1% w/w increased the color stability of green tea water extract. The addition of sodium sulfite 1% w/w didn't decrease its antibacterial activity against *Propionibacterium acnes*. Martono studied the potency of industrial tea waste by comparing green and black tea industrial wastes as UV filter for sunscreen. He suggested that black tea waste extract is more potential than green tea waste extract as photoprotection substance. Wibowo et al explored the influence of dose and time regimens of 7,12-dimethylbenz-[a]anthracene (DMBA) on development of mammae carcinogenesis on *Sprague dawley* female rats. They concluded that the dose and frequency of DMBA will affect the successful development of mammary gland carcinogenesis.

We wish to thank the authors who contributed to this issue. We are grateful to the Organizing Committee and to our Sponsors for their contribution to meeting. We would like to express our special thanks to Prof. Edy Meiyanto, the President of the Indonesian Society for Cancer Chemoprevention for his encouragement and support needed to organize the meeting and this journal. Publication of this issue of the Indonesian Journal of Cancer Chemoprevention was financed by Indonesian Society for Cancer Chemoprevention.

Editor in Chief,

Arief Nurrochmad, Ph.D

AIMS

Indonesian Journal of Cancer Chemoprevention is a three annual international journal devoted to the publication of articles on all aspects cancer chemoprevention including experimental and clinical pharmacology, especially concerning anti-oxidants, antiaging, anti-inflammation, anti-angiogenesis, and anti-carcinogenesis; cancer detections and also applications of stem cell technology; Immunology research, especially on immunomodulation; In vitro and in silico exploration on chemoprevention mechanisms; Screening of natural (plants, marine natural products, etc.) and synthetic chemopreventive agents; Cultivation of chemopreventive plants and development of herbal dosage forms for chemoprevention; and Development of herbal cosmetics formulation.

INSTRUCTIONS TO THE AUTHORS

Submission

Abstract was written in 1 space, one column, the manuscript 1.5 space with 1 column format, the overall amount of approximately 10 pages, with top and left of the format is 4 cm, right and bottom 3 cm from the edge of quarto paper (A4), must be clear for easy reading.

The manuscript must be written in clear and concise English and should comprise : (a) Title page; (b) abstract; (c) Keywords; (d) Background; (e) Materials and Methods; (f) Results; (g) Discussion; (h) Conclusion (i) Acknowledgement, if any; (j) References. Appropriate Results and Discussion may be combined.

The manuscript

Title page

Title must be concise and informative.

First Author¹*, **Second Author, etc, (given name followed by surname), Times New Roman 12 pt, bold, double space, centered**

¹Institutional affiliation(s), Times New Roman 12 pt, double space, centered

*Corresponding author: contact of the corresponding author, affiliation, address (optional), phone number (optional), city, country, email address

Abstract and keywords

Write the abstract using single spacing. The abstract provides a clear and concise summary of the information in an article. The abstract should include a background for the work, a brief description of the methods, a summary of the results, and a conclusion. They are indicative only and will not be used for citation purposes. The abstract should be between 200 and 300 words.

Key words: provide a list of a most 5 key words for the abstract, separated by commas (,)

Introduction

The *introduction* should state the purpose of the paper. It should not review the subject extensively

Material and Methods

Materials and Methods should be described in detail sufficient to enable the work to be repeated, and suppliers of materials and equipment given, if necessary.

Results

Results should be presented in logical sequence, with tables and illustration as appropriate.

Discussion

Discussion should emphasize the implication of the findings, their limitations, and relevance to other studies. It should not be a recapitulation of the *results*.

Conclusion

Acknowledgment

Fill this with the acknowledgement section of your manuscript if any

References

The Harvard System is used. References in the text should be quoted in the following for single, two or more than two authors respectively: King (2000), Hanahan and Weinberg (1999), Choi et al. (2005). Multiple papers referred to together in the text should be given in chronological order.

The references should be listed alphabetically at the end of the paper. The journal titles should be abbreviated to conform to the style of Index Medicus. The layout should be as follows.

for journals

Chen, Y. Shen, S., and Lin, H., 2003, Rutinoside at C7 attenuates the apoptosis-inducing activity of flavonoids, *Biochem. Pharmacol.*, **66**(5), 1139–1150.

for books
