Preface

Indonesian Journal of Cancer Chemoprevention (IJCC) is an Indonesian leading journal in cancer chemoprevention with international level. We publish all aspects of cancer chemoprevention, including experimental and clinical pharmacology, cancer detections and also applications of stem cell technology, immunology research, *in vitro* and *in silico* exploration on chemoprevention mechanisms, screening of natural (plants, marine natural products, etc.) and synthetic chemopreventive agents, cultivation of chemopreventive plants and development of herbal dosage forms for chemoprevention, and development of herbal cosmetics formulation.

This issue contains various six articles related to the development of plant's compound as the source of chemoprevention agent. Mahdi *et al* explored the effect of goat milk yogurt for prevention hypercholesterolemia based *in vivo* study. Suwarso and Anggraeni conducted the effect of bombay onion extracts on mitotic chromosomes. Other study on antiaging activity of *Cucurbita moschata* ethanolic extract on fibroblast cells was explored by Muntafiah *et al*. An interesting study also was done by Hilaria *et al* who explored the effect of propolis extract to heal the burns in rabbits. In this issue, another *in vitro* experiment were done by Rivanti *et al* on Heartwood of secang (*Caesalpinia sappan* L.) ethanolic extract which exhibit selective cytotoxic effect on T47D and Widr cells but no Hela cells. And this issue also told about hepatoprotective effect of Basil Leaves (*Ocimum sanctum* L.) infusion done by Yuliani *et al*.

We wish to thank the authors contributed in this issue. Editors encourage other researchers to explore more combination chemotherapy agent and molecular mechanisms, and published the articles in IJCC.

Sincerely,

Dr. Arry Yanuar, M.Si., Apt.
